# Upgrade your in-office patient check-in with Arrive

Create staff-free patient experiences that modernize your practice with a digital in-office check-in solution.

**Streamline your waiting room with Arrive.**

Collecting information upon patient arrival is a manual and burdensome process. And long lines in the waiting-room impact patient satisfaction—as well as practice reputation.

## Patients are demanding convenience

**43%**  
of patients

feel frustrated when wait times hit the 20 minute mark or sooner

**1 in 4**   
patients

changed providers specifically to avoid long wait times

## Revolutionize your patient arrival process with the improved in-office check-in experience that creates staff efficiencies.

Upon arrival, patients can scan the Arrive QR code or utilize an office supplied tablet or kiosk—minimizing the time staff spend on check-ins. Patients complete required check-in steps and staff monitor a patient's status with real-time EHR integration.

**Streamlined insurance and ID card collection:** Allow patients to submit insurance and ID card images, eliminating the need for physical exchange of cards

**Facilitate check-in for walk-in patients:** Enable patients without scheduled appointments to check-in for their appointment digitally

**Up-to-date status monitoring:** Give staff the ability to monitor patients who may need assistance in real-time

**Reduce hardware investments:** Lower the amount of in-office hardware by allowing patients to scan the Arrive QR code with their personal device
